Interpretabilidad & Causalidad en ML

Gradientes Integrados en Deep Learning

- Introducción a los encajes
- Gradientes integrados

SHAP & LIME

¿ D U D A S ?

Encajes

Vectores asociados a Tokens en NLP

$$x = (x_1, x_2, \dots, x_d)$$

	Higos	Fresas	Uvas	Papaya
Andrés	10	1	2	7
Brenda	7	2	1	10
César	2	9	7	3
Daniela	3	6	10	2

¿QUÉ SIGNIFICAN?

- Causa perdida (en general)
- Conceptos de conceptos
- [En LLM se ha observado correlación geo-espacial](#)

Cercanía

- Palabras similares van a dar a palabras similares
- La resta entre dos parejas de palabras similares son vectores similares
- ¿Con más palabras?

Analogías

EN EL PLANO CARTESIANO

A large, stylized fingerprint graphic in a light beige color, occupying the top half of the slide. The ridges are curved and flow from the top left towards the bottom right.

Anthropic

On the Biology of LLM

Human: What is $\text{floor}(5 * (\text{sqrt}(0.64)))$?
I worked it out by hand and got 4, but
want to be sure. Think step by step
but be brief.

Assistant: Let's solve this step by
step:

1. First, $\text{sqrt}(0.64) = 0.8$
2. Then, $5 * 0.8 = 4$
3. $\text{floor}(4) = 4$

So the answer is 4. Your hand
calculation was correct.

A large, stylized fingerprint graphic in a light tan color, centered at the top of the slide.

AphaFold

Improved protein structure
prediction using potentials from
deep learning

AlphaFold2 & AlphaFold3

- **Input:** Información secuencial
- **Output:** Información tres dimensional (3-tensor)
- **Dataset:** complicado de obtener (supervisado)

Desigualdad del triángulo

Interpretabilidad en Redes Neuronales

Integrated Gradients

Integrated Gradients

¿Derivada parcial
en un registro?

$$\lim_{\delta \rightarrow 0} \frac{l(x + \delta) - l(x)}{\delta}$$

FUNCIÓN SIGMOID

Integrated Gradients

$$\text{IG}_i(x) = (x_i - x'_i) \int_0^1 \frac{\partial F(x' + \alpha(x - x'))}{\partial x_i} d\alpha$$

Para el caso de Tokens

$$\text{token attribution} = \sum_{j=1}^d \text{IG}_j$$

El Teorema Fundamental del Cálculo

$$\sum_i \text{IG}_i(x) = F(x) - F(x')$$

Precisión Local

$$f(x) = \phi_0 + \sum_i \phi_i x_i.$$
